I have approx. 30 years of experience in electrical and ATEX issues. I have been working in different kind of industries (power plants, waste, pharma and food). Have experience both as consultant and as maintenance employed, which gives me an all round view and possibilities. I have among other things worked with supply, instrumentation, electrical design, MCC panels and IO panels. Regarding ATEX I have worked with classification, design, inspections, education and consulting. Otherwise, I have a lot of skills regarding management, time Schedules and legislation (electrical/ATEX/HSE).

Education/Courses

1996-2002 Technical Management
